provisions & bonded store

We offer a wide range of international & local food products, which are stocked in the most optimum conditions available in the ship supply industry nowadays. The quality of our products is our top priority, therefore we make sure they are supplied enables transportation of our products under correct & controlled temperature and therefore unbreak the cold supply chain.

Cooling temperature of our refrigerated trucks is electronically monitored & the truck temperature data is regularly recorded & stored. We can easily provide you with the temperature data whenever required after the delivery. Besides, we own a 10ft reefer shipping container which is used to store provisions & other perishable goods during our offshore supply operations. In order to ensure fresh & colorful supply of the fresh seasonal fruits & vegetables as they are, we purchase them from local wholesalers on the day of delivery, We also make sure that our products are properly packaged & labelled.
